

What do I want from a job?

MATHS

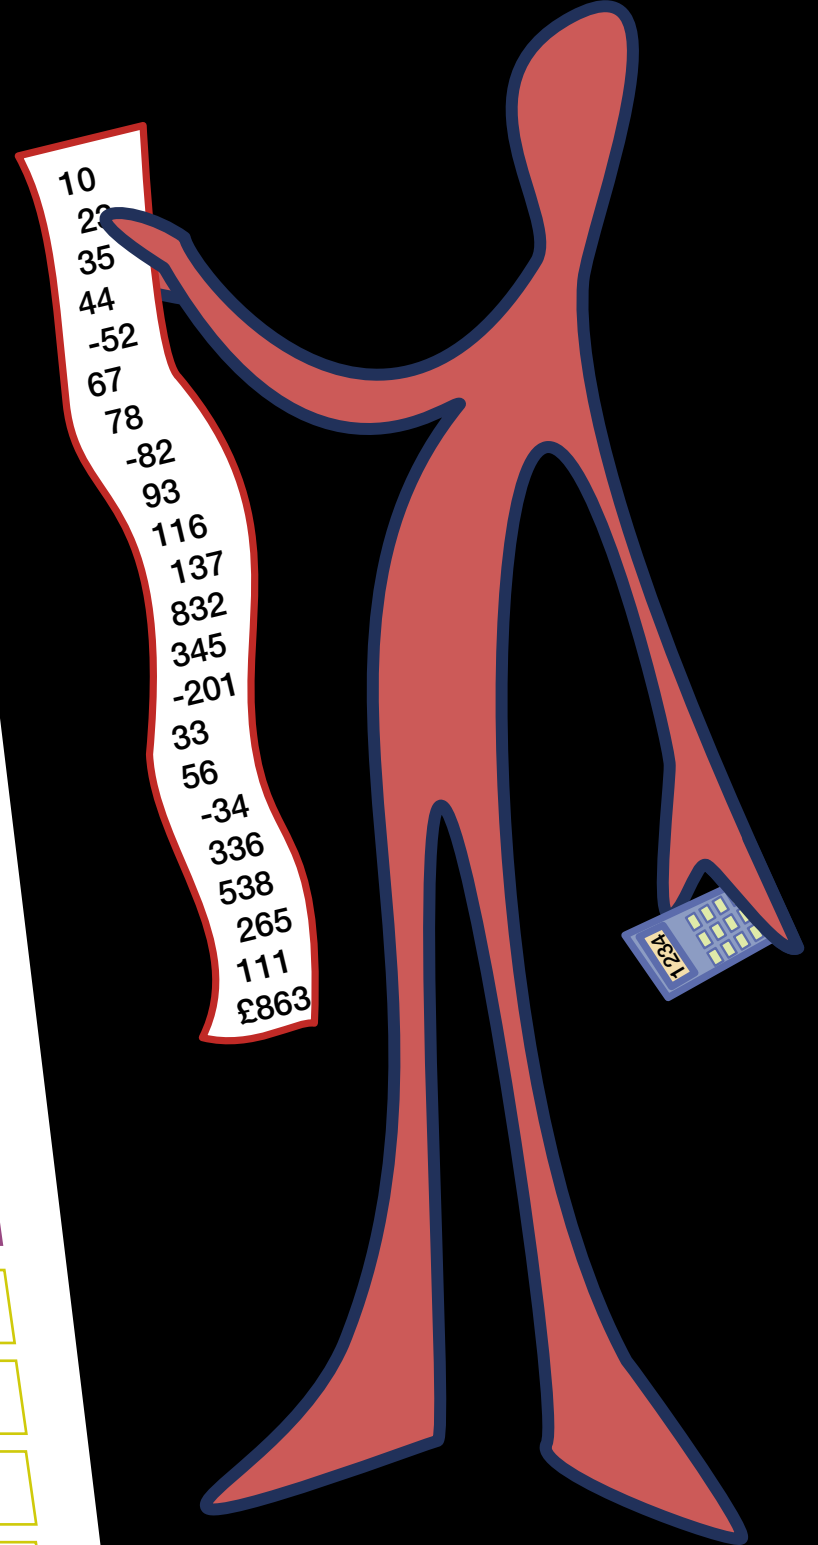

I want to be paid!

Life is often easier when you can work something out. Such as how many hours you have worked or your monthly pay.

Mathematics can help you solve real-life problems, learn about shape, space and measurement and teach you how to add up!

How mathematics is used in a job

It can help you give a customer the right change, work out how much paint is needed to decorate a room or what 20% off means.
